

Iraq Cell Company for Communications:

Our Vision

Best Price/Performance Ratio

We are committed to build and operate the network for our customers with the best performance at the lowest possible total cost.

Outstanding Quality, Reliability and Service

Iraqcell has an unsurpassed commitment to quality and

reliability. By principle we are bound in our backbone to a unique cable laying depth of 1.8 m and the use of highest quality cables only from world leading manufacturers.

Premium quality of service, redundancy and optimized design of the network are to lead to the highest degree of acceptance of our customers and a long-standing relationship to a mutual benefit.

Quality policy

Iraqcell is committed to meet the customer's technical and regulatory requirements concerning delivery and installation of telecommunication projects posed by them and this by providing resources and capabilities necessary to

implement its Quality Management System and proceed to develop and improve it continuously in accordance to the rules and regulations of ISO 9001.

The head management assures its commitment to implement and review the quality objectives inspired from this policy.

And the company asserts that the quality policy has been attained and absorbed in all processes of the company and is being reviewed periodically to achieve a continuous suitability.

Sustainability

Sustainability is an essential moral and economic imperative for companies. At Iraqcell we want to make sustainability the centre of our activities. As leaders, we want to integrate strategy, sustainability and control and entrench the values and ethics that underpin sustainable practices.

Sustainability is not just about green initiatives or reducing our carbon footprint. Sustainability in business terms means securing sustained profits, co-operative relationships with stakeholders, aligning business products and services with societal interest, mitigating negative societal impacts and enhancing positive impacts.

Iraqcell has a strong commitment to the principles of Broad-based Economic Empowerment and continuous efforts to improve environmental performance through training and awareness of our staff.
